SIROLIMUS COATED PTA BALLOON CATHETER

SIROLIMUS

MagicTouch **AVF**

SIROLIMUS COATED PTA BALLOON CATHETER

Sirolimus coated polymer free balloon for the treatment of dysfunctional Arteriovenous Fistulae and Graft.

- Higher patency at 12 months compared to POBA and PCB
- **NANOLUTE TECHNOLOGY**
Encapsulation of sub micron sized Sirolimus particles in phospholipid carriers for effective transfer to deepest layer of vessel
- Programmed drug release ensures Sirolimus addresses therapeutic window is available for treatment in target tissue till 120 days
- Better re-wrap for minimal in-transit drug loss
- Low tip entry profile for better trackability and deliverability
- Reduces chronic inflammation by avoiding the use of polymers
- Pro healing properties of MAGICTOUCH AVF facilitates healing post procedure in dysfunctional AV Fistulae
